

Time / Cost Estimate

Time: Prep - 1 hr / Active - 1 hr

Students will spend 45 minutes analyzing the evidence found at the crime scene (approximately 5 minutes per station, in addition to 15 minutes of crime scene investigation). The remaining 15 minutes can be spent discussing the students' results and final conclusions as a class.

Initial Cost: \$37.00

The total cost will likely be lower than \$37.00 since some of the supplies needed for this activity can be found around the classroom. The more expensive items, such as magnifying glasses and shoes, are reusable and will lower the cost of the activity if it is repeated in future years.
