

## Time / Cost Estimate

**Time: Prep - 30 hr / Wait - 50 hr / Active - 15 min**

The construction of the set of 13 dominos takes approximately 80 hours, but can vary greatly depending on individual level of skill with a screw gun and mitre saw. Most of the preparation time is the drying time for the paint and varnish. The set is very durable, provided proper care of the dominoes is taken; it can be reused for many years. Setting up the dominoes only takes about 15 minutes.

**Initial Cost: \$99.00**

The cost represents the expenses in creating a 13-piece domino set. Reproducing the demonstration once the dominoes have been made costs nothing. Therefore, although the fixed cost of this demonstration is high, the use of the set many times over a few years brings the average cost per demonstration to a very reasonable level. Although the WOW Lab set contains 13 dominoes, the teacher can make fewer dominoes to illustrate the same principle.
