

a WOW Lab

BLUEPRINT

Milk Medley

Time / Cost Estimate

Time: Prep - 5 min / Active - 1 hr 15 min

The total time includes performing all three sections of this activity. Each section takes about 25 minutes to complete. While technically not part of the activity, a 24 hour wait will improve the consistency of the glue, as well as the taste of the butter and the cheese.

Initial Cost: \$32.00

The cost includes all three sections of this activity. To simplify planning, the cost associated with each section is listed below. Note that the individual costs will not add up to the total initial cost as some materials purchased for one section can be reused in another. Some of the materials may be brought from home to lower the cost.

Changing Cream into Butter: \$17.00

Changing Milk into Glue: \$12.00

Changing Milk into Cheese: \$6.00
