

Lesson Logistics

Learning Outcomes

K to Grade 3
Exploring the world with our senses
Daily and seasonal changes
Air and water in the environment
Plant growth and changes

Class Organization

For *Real Flowers*, ask the students to sit in a manner that offers a clear view of the flower.

For *Filter Flowers*, students can create individual flowers.

Notes

There are two activities in this blueprint, *Real Flowers* and *Filter Flowers*. They can either be done separately or together.

Further Exploration

This activity provides a good gateway to discussions about the different parts of a plant, plant reproduction and the elements needed for plant survival, such as water, nutrients and light. One way to demonstrate these principles is to grow a small garden or some potted plants with the class.
