

a WOW Lab

**BLUEPRINT**

The Siphontific Method

## Time / Cost Estimate

**Time: Prep - 45 min / Active - 1 hr 45 min**

The prep and a test run of the demonstration should be completed before students arrive. If only the activity is being completed, almost no prep is required after the supplies have been collected.

The demonstration and student activity can be performed in the same lesson or spread over two sessions, in order to include time for teaching the steps of the scientific method.

**Initial Cost: \$96.00**

Note that almost all items are reusable and will not need to be replaced for future runs of the demonstration and activity. Additionally, groups can share tubing with one another to save on costs.
