

Weather Station

Introduction

Everyone experiences weather on a daily basis. In this activity, students will explore various forms of weather by creating their own snow, clouds, thunder, rain, wind, rainbow and thermometer inside their classroom.

The *Weather Station* highlights the roles of light, heat and water in creating many of our planet's weather patterns. Students will develop an understanding of changes in the weather and the seasons. They will be introduced to the scientific reasoning behind these common weather concepts.
